

Your reliable partner for hygiene

Catalog

2022

PREFACE

Dear readers,

One year ago, we presented our first catalog. That was our first attempt to give you an overview of our existing product portfolio, but also to bring awareness about hand hygiene. To our great pleasure, it was very well received, and your feedback encouraged us.

Due to the global pandemic, the past months have made us even more conscious of efficient and effective hand hygiene. COVID19 has raised our awareness of this, and the lives of all of us dramatically changed. Many companies, authorities, and institutions suddenly have faced an uncanny threat, for whose effective combating, sophisticated hand disinfection is crucial. For us, the resulting demand was a challenging task. Although it was very stressful for us at times, we managed to solve it logistically and qualitatively well.

Today you receive our product catalog in a new look incorporating many of your suggestions. We carefully listened to your needs, and regarding that made this catalog much more extensive with new product categories and possibilities for further customization. For an even more detailed view of our products, please visit our newly designed website (euraneg.com), which will be available from February 2021. There you can download this catalog, our product pictures, videos, product descriptions, and operating instructions. Along with the scope, our product assortment has grown, which enables you to meet the increased hygiene requirements even better. We are constantly working on developing new products, but no longer exclusively for the medical sector, but all sectors with risen requirements for hygiene.

Together, you and we were able to make a decisive contribution to public health in the fight against the pandemic, and we will continue to do so in the future, not only because of COVID19.

In this sense, we are looking forward to a good cooperation!
...and stay healthy!

Sincerely,

A handwritten signature in black ink, appearing to read 'Markus S'.

ABOUT US

WHAT IS IMPORTANT TO US

We are frank and open-minded, which means that we are committed to our tasks and accept changes. Your request is our challenge to take on responsibility and to improve ourselves.

Our customers are our partners, accompanied by the beginning of delivering the best value. We listen to your needs to find better solutions and increase our service at a higher level because our joint efforts make our work important.

OUR VALUES

Commitment and quality. We are committed to the requirements of our customers. We don't just want to meet your expectations, we want to exceed them with high-quality products and service. The core of our work is commitment and solidarity to our colleagues and partners that built-in quality.

Integrity and reliability. Acting honestly and respectfully, keeping our word without resentment is what makes us a reliable partner. We keep our positive attitude-even in difficult times.

OUR LOCATIONS

Our high-quality standards ensure that you will find the best possible solution for your needs in our wide range of innovative hygiene products.

Our products are produced of the best german quality from Bavaria and worldwide locations in China and Taiwan.

GERMANY

CHINA

TAIWAN

For more than ten years, Euraneg has been a leading developer and manufacturer of hygienic solutions. We hold international patents for various pump technologies and dispenser systems. Our innovations are always oriented towards customer needs. While implementing new regulatory requirements such as hygiene guidelines, flexibility, and customer orientation are of great importance to us.

Euraneg is a long-standing supplier to the German hygiene industry. As a "White Label" partner, we develop exclusive, tailor-made solutions for other companies within the scope of customizing. Thanks to our wide range of printing and color options, our products can be customized according to customer requirements. That also includes creative design concepts, with which we keep our product range attractive beyond the classic applications in the hospitals, but for many other industries such as retail, hospitality, education, etc. We are constantly working to be better and faster in our field. To push the boundaries of classical disinfection, we foster innovation and competitiveness. Euraneg is a company with a big mission to make a decisive contribution to public health together with you.

Your reliable partner for hygiene

Our novelties for better hygiene in 2021

Hand hygiene has never been more important, and we have never been more eager to conquer the upcoming challenges. We tried to respond not only to the challenges of the current pandemic situation but also to make a difference through creative ideas and innovation to surpass conventional standards and provide important solutions for the hygiene market. The focus is on the user, modern design as well as on high-quality hygiene available everywhere. We prepared for you a lot of novelties on the next pages, and some of them we wanted to show you here.

First of all, we want to introduce our SD2015-Multi.Use. This dispenser, made in German quality in Bavaria, is an improved, multifunctional version of our existing arm lever dispenser that sets a new standard like no other product in that field. In addition to EURO-bottles from various manufacturers in different volumes, the Multi.Use is suitable for hygiene packages too. It can dispense foam, discrete jet, and spray via its various pump variants. The design can be customized in different ways with colored arm levers and drip trays, as well as logo printing. We made one more improvement by making this dispenser lockable.

SD2015
For more information about this product, check page 34

With the Touchless Cube series (SD7000), we give an elegant answer to the customer's request for design, and hygiene. The dispenser made of brushed stainless steel is refillable and easy to use. Besides a silver-colored housing, the dispenser is also available in various colors and shapes. The display provides information about the filling level, time, and temperature and perfectly fits its place either by wall mounting or as a standalone device.

SD7000
For more information about these products, check pages 20-23

Our SD3100 comes in a cylindrical shape with a puristic design. It is simple in its design, completely touchless, and can dispense fine foam. The SD3100 is ergonomically optimized and sustainable with its refillable container. It can be used for disinfection as well as for soap.

SD3100
For more information about this product, check page 18

Covid19 increased the importance of aseptic cleanliness at any location. Our flexible dispensing options encourage hand hygiene compliance for patients, visitors, and staff everywhere. Their main characteristic is a flexible choice of location and mobility. Our sanitizer stands and hygiene towers enable you to put our dispensers everywhere. For high frequented places, we offer sanitizer stands with exchangeable containers and integrated liquid tanks with a capacity of 5 to 20 liters. The sanitizer stands operate with an arm lever or touchless dispenser. Additionally, we offer foot-operated models with integrated pump for all sizes of exchangeable containers. What makes them special is the possibility to use the display area for branding or advertisement. The sanitizer stands come in different materials such as metal, acrylic, and HPL in various colors.

Those are just a few new products, and much more you can find on the following pages. Through our products, we tried to find better answers to hygienic demands. We hope that we did it successfully and that you will find your favorites. We are proud of the work and solutions that we made this year, and we won't stop on this. We will keep on going to provide you even better solutions, to receive your suggestions, keep up with hygienic demands, and finally to convert them into valuable products.

Thank you for being with us!

TOUCHLESS SENSOR DISPENSERS

Completely contactless. For even better hygiene.

TOUCHLESS UPRIGHT SENSOR DISPENSERS (ABS)

SD4005/SD4010

OUR BESTSELLER

The SD4000 touchless series is our flagship among the sensor dispensers and enables even better hygiene. We offer this bestseller in two versions: the SD4005 is able to carry from 250ml to 500ml EURO-bottles and SD4010 for EURO-bottles from 500ml to 1000ml. What makes it exceptional is its functionality and a unique patented roller pump. Both can be used for low-viscosity disinfectants and gels, as well as for liquid soaps and lotions. The application of the liquids is carried out as a jet or a spray. According to your needs, you can choose between four different dosages from 1.6ml to 6.4ml.

The series is available completely in white but also in combination with colored drip trays (gray, blue, green, pink, white). That gives you the opportunity to make different variations of the dispenser as well as to distinguish different liquids by colors. Due to their front window at the front cover, the current fill level and the used liquid are always visible. The SD4005 and the SD4010 touchless dispensers are suited for wall mounting, drilled or glued, and stand-alone. The series is therefore good for highly frequented places where minimum contact is needed. In combination with an elegant stand, it can be a real eye-catcher! For even better results, there is an upgrade for hygiene monitoring.

Number 1 among the sensor dispensers

- 4 x AA batteries with a guaranteed runtime of at least 20 000 cycles
- Four adjustable volumes (from 1.6ml to 6.4ml)
- Individually packed in polybag and cardboard box with drip tray, batteries, and mounting material, spare pump, operating instructions with stickers "Soap" and "Disinfection"
- For wall mounting or as a stand-alone

PURE 1 & PURE 2 (ABS)

SD3100/SD3200

The SD3100 Pure 1 and the SD3200 Pure 2 are two perfectly shaped, battery-operated "touchless" dispensers made of white ABS plastic. The Pure 1 is classically flat, while the sister model, with its inclined lid, has a slightly more dynamic look. Both are foam dispensers with unscrewable containers that can be filled with 350ml soap.

Pure 1 comes with an exchangeable recyclable cartridge system for which we offer different sustainable soaps.

On the other hand, Pure 2, has a refillable container, which can be reused with various soaps and disinfection. Pure 2 is available either with a foam or a spray pump. Both dispensers are practical to use, easy to maintain, and sustainable. Their usage can be maintained in many different places that take care of simplicity, sustainability, and cleanness. With our optional wall bracket, we offer a space-saving and simple wall mounting option.

- Dispenses foam without dripping
- 4 x AAA batteries for 20 000 cycles
- Sustainable container with 350ml filling volume
- Individually packed in a cardboard box with batteries and operating instructions
- For optional wall mounting or as a stand-alone

CARTRIDGE OR REFILLABLE
FOAM DISPENSER

TOUCHLESS OVERHEAD SENSOR DISPENSERS

SD7000/SD7001/
SD7002/SD7100/
SD7150

The SD7000 series is our stylish answer to hygienic requirements. This series of dispensers, made of brushed stainless steel or color coated steel, is multifunctional, refillable, and easy to operate. The SD7000 series is made for those who like to be stylish and modern in all aspects of their work, as well as in hygiene.

Besides the hygienic purpose, some of the dispensers have an integrated screen that shows time, temperature, and current filling level. This series of dispensers are available in different colors and shapes for wall mounting or as a stand-alone device. They are equipped either with a reusable container for a refill or can be refilled with a pouch system. This series can be used either with disinfectant or liquid soaps with available pump systems for foam, spray, and jet. Depending on the dispenser, the filling volume can vary from 500ml to 700ml.

With its design, this series fits perfectly in hotel lobbies, restaurants, business premises, etc. This series is a seductive reminder to take a little time for maximum hygiene.

- 4x AAA batteries
- Individually packed in a cardboard box with batteries and operating instructions
- For wall mounting or as a stand-alone
- Different styles and filling volumes
- Adjustable dosage

STYLISH & COMPACT

REFILLABLE

OVERHEAD

CUBE LINE (stainless steel)

SD7000/SD7001/SD7002

- Stainless steel housing with rounded corners and integrated drip tray
- Robust and elegant at the same time
- Fully mirrored display: with integrated time, temperature, and fill level display
- Can be wall-mounted or used as a standalone unit
- Wall mounting: screws and dowels or adhesive
- For low-viscosity disinfectants, gel, liquid soap, or lotion
- Refillable HIPE plastic container with 500ml capacity - leakproof
- Three different exchangeable pumps: jet, spray, or foam in five different dosages (adjustable in 0.5 ml steps from 0.5 ml to 2.5 ml)
- All electronic components are sealed for safe use
- Available in different colors: stainless steel, black, blue, red, and pink

THREE DIFFERENT PUMP SYSTEMS

DIFFERENT SHAPES AND COLORS

REFILLABLE OR POUCH SYSTEM

CUBE NX SD7000

The Cube NX inspires with its clean design and integrated form. Ideally suited as a standalone unit on a counter or tables in lobbies, receptions, restaurants, or offices. It is available in two colors: silver (brushed) and black.

Item No.	EAN	Description	WxHxD in mm	RRP
SD7000-d	8719325697551	Cube NX brushed	270x145x90	99,00€

SD7000-12	8719325697797	Foam Pump		4,00€
SD7000-75	8719325697100	Mounting set		2,00€

CUBE NJ & CUBE MS SD7001/SD7002

The Cubes NJ and MS are design variants of the Cube NX. The NJ floats freely on a square base that extends the cuboid to a rectangular shape but does not form a disinfection chamber as with the NX. It is best suited for mounting on the wall or a sanitizer stand. The MS has a square appearance with its four rounded corners. Its slightly beveled design, which is directed towards the user, accentuates its many display functions even more clearly. Besides black and silver, these two dispensers are also available in blue, red, and pink.

MONO

(ABS, stainless steel)
SD7100

The Mono and Pillar are our offerings for overhead touchless refill dispensers. The brushed, cylindrical stainless steel housing is sturdy and stylish. The leak-proof HIPE plastic container has a filling volume of 700ml and is suitable for low viscosity disinfectants, gels, soaps, or lotions. Two different pumps are available: jet or foam. The dosing quantity can be adjusted in five steps, from 0.5 ml to 2.5 ml.

For safe use, all electronic components are sealed watertight.

TOUCHLESS MINI SENSOR DISPENSER (ABS)

SD3015

Our Touchless Mini Sensor Dispenser impresses with its striking functionality and its clean, minimalist design. With the SD3015 we offer an overhead system for different bottle types and volumes. It is suitable for EURO-bottles as well.

To ensure compatibility with the different bottleneck diameters of the many soaps and disinfectants (Sterilium, Aseptoman, Softa-Man, Skinman, etc.), we offer the pumps with several diameters (28mm and 32mm) or with adapters.

- 4 x AA batteries for 30 000 cycles
- Four adjustable dosages (from 1.6ml to 6.4ml)
- Exclusively for wall mounting (fixing material included, lockable)
- Individually packed in polybag and cardboard box
- Drip tray, disposable pump for 28mm or 32mm bottle threads as well as adapters for other bottle threads are available individually

MANUAL DOSING DISPENSERS

Classics in different shapes and materials

MANUAL UPRIGHT ARM LEVER DISPENSERS (ABS)

SD2005/SD2010

The SD2005/SD2010 arm lever dispensers are made from impact-resistant white ABS plastic. We offer this bestseller in two versions: SD2005 for 500ml and SD2010 for 1,000ml Euro-bottles. With an accessory adapter, you can use the one-way Ophardt DHP pump. All types of disinfectants, liquid, soaps, massage oils, and lotions can be used in different dosages (0.8ml, 1.2ml, and 1.8ml) with our jet, spray, or foam pumps. The selectable dosage ensures optimal hand hygiene and care.

The SD2005 and SD2010 are available completely in white but also in combination with colored arm levers and drip trays in blue, green, grey, and pink. The SD2005 and SD2010 are suitable for wall mounting or on a sanitizer stand. That allows you to make a different variation of the dispenser, as well as to distinguish different liquids by colors. Due to their window at the front cover, the current fill level and the used liquid are always visible.

We also offer customizations of the dispenser, for example, logo or text imprints. Individually packed in a cardboard box with mounting material, wall mounting plate, arm lever, drip tray, pump, and operating instructions with stickers "soap" and "disinfection". The adhesive mounting set is available as an option for mounting.

- Adjustable dosage
- Two sizes; different colors
- For wall mounting or as a stand-alone

MANUAL UPRIGHT ARM LEVER DISPENSER

(ABS)

SD2015

NEW

The SD2015 Multi.Use is our new multifunctional arm lever dispenser produced in best German quality. It can be used for both 500ml and 1000ml EURO-bottles of all disinfectants, liquid soaps, lotions, and massage oils. There are various Euraneg pumps such as foam, spray and jet available as well as the Ophardt disposable DHP pump. There is a possibility to select a dosing quantity that ensures optimal hand hygiene and care. Thanks to a new type of fixations, different hygiene packagings can be used in the Multi.Use. Individual customization with logo or text prints and color combinations of the arm levers and drip trays is possible. That allows you to make a different variation of the dispenser as well as to distinguish different liquids by colors. Through the opening at the front cover, the current fill level and the used liquid are always visible.

This dispenser meets the highest hygiene requirements of hospitals or nursing homes, as well as the customer demands in the hotel industry, gastronomy, retail trade, public places, and schools. Our wish was to put the functionalities of more dispensers in one and to create a multifunctional dispenser. That is why this dispenser is called "Multi.Use", which means that it can be adapted to changing requirements and hygiene-regulations. Individually packed in a cardboard box with mounting material, wall mounting plate, pump, and operating instructions with stickers "soap" and "disinfection".

- Adjustable dosage; different colors
- One fits all packagings
- For wall mounting or as a stand-alone

UPRIGHT SYSTEM

MADE IN GERMANY

Hand hygiene in public spaces, in representative or highly frequented locations, requires dispensers with a robust design and an attractive, high-quality look. For this reason, the new Euraneg SD6000 series arm-lever dispensers are made of materials such as aluminum or stainless V2A chrome-nickel steel (1.0 chrome-nickel steel (1.4301).

The production takes place 100% in Germany. For the SD6000 series, we have adopted the Multi.Use as a concept known from the SD2015. No matter which bottle volume of dispensing form (jet, foam, spray) is required, these dispensers meet the highest clinical demands of hospitals or nursing homes, as well as the hygiene requirements in the hotel industry, gastronomy catering trade, retail trade, authorities, and schools. The exchange of liquids is easy, fast, safe, and compliant by changing the 500ml to 1000ml EURO bottles of all disinfectant manufacturers. With our optional pump holder, Ophardt pumps, or DHP disposable pumps, hygiene packs can also be used.

The selectable dosage (0.8; 1.2; 1.8 ml) ensures optimal hand hygiene and care. With special logo imprints, different material and color combinations for the drip trays, as well as optional lockable caps for the bottles, the dispensers can be further customized.

The SD6000 series consists of three models: SD6000, SD6050, and SD6060.

MULTI.USE-ARM LEVER DISPENSER (stainless steel)

SD6000

The SD6000 is equipped with a wire-arm lever and a removable plastic cover in the upper front area. The dispenser is designed with a wire-arm lever and a removable plastic cover in the upper front area, which is available in different colors. The dispenser can be extended with lockable metal end panels for the bottle. These covers are available in aluminum, stainless steel or RAL colors. They are designed in powder-coated steel with a large and small viewing window and with or without an integrated metal drip tray. As an alternative, there is a plastic drip tray in the same color as the plastic cover. The drip tray is necessary for use as a floor-standing unit. The scope of delivery of the basic version (SD6000-s) includes the metal housing, wall mounting plate, arm lever, and pump. The panels and drip trays can be selected as additional accessories.

EURO-BOTTLES AND BOTTLE HOLDER

Our dispensers are always delivered without bottles. For customers who need a bottle, we offer EURO standard bottles with 500ml or 1000ml volume.

Bottles are made of white plastic, tasteless, and odorless, and they are refillable.

The bottle holder in the housing ensures the safe positioning of the bottle.

MANUAL OVERHEAD DISPENSERS

**SD1015/SD1300/
SD1350/SD1400/
SD1450/SD1500**

There are often customer requirements for robust and simple hygiene solutions for sanitary areas in buildings or public spaces. To satisfy these requirements, Euraneg offers a range of push-button and hand lever dispensers that have been developed for freely accessible locations or quick retrofitting.

The simple push-button and hand lever dispensers are our recommendations. The button dispenser SD1015 is good for a quick subsequent assembly. Designed as an overhead system, it can be easily adapted to a variety of different bottle types with a volume of up to 1000ml by using different adapters. It takes up little space and is fixed to any smooth surface by adhesive mounting.

The SD1400/1450 dispensers are suitable for frequently used areas. The two push-button dispensers have a classic, stainless steel housing, secured by an additional lock. This prevents the theft of disinfectant or at least makes it much more difficult. The SD1400 holds a container for disinfectants and soaps with a filling volume of 1000ml. The SD1450 model offers an even wider range of use. Since it consists of two independent containers with 500ml each, they can be filled differently.

The hand lever dispensers, SD1300/SD1350/SD1500, are also made of stainless steel, and they are waterproof and lockable. Their housings are classically designed, and their clear conception makes their maintenance and usage simple. The SD1300 and SD1350 differ from SD1500 only by their filling volume.

MANUAL MINI-DISPENSER

(ABS)

SD1015

The manual MINI version is:

- very compact
- made of impact-resistant ABS plastic
- for low viscosity disinfectants, disinfection gel, liquid soap, and lotion
- color: grey/white.
- for different bottle sizes, dosing volume of approx. 1ml.
- delivered and packed in the single carton without the pump and Drip tray, 2x screws, 2x dowels, and 2x washers for assembly
- drip tray, disposable pump for 28mm or 32mm bottle threads as well as adapters for other bottle threads are available individually

Spare parts and accessories for the Manual Mini Dispenser can be found on pages 28 and 29

PUSH BUTTON DISPENSERS-SINGLE AND DOUBLE SD1400/SD1450

The two push-button dispensers, SD1400 and SD1450, have a classic design, and each has a stable body made of brushed stainless steel.

Due to the clear conception, their application is easy and self-explanatory. The SD1400 has a filling volume of 1000ml. The SD1450 model offers an even broader range of use. As it consists of two independent containers with 500ml each, they can be filled with different liquids.

HAND LEVER DISPENSERS SD1300/SD1350/SD1500

The dispensers, SD1300/1350/1500, are robust hand lever dispensers for often daily use in public places. They have classic, matt stainless steel housings, secured with an additional lock. That makes theft considerably more difficult. The SD1300 has a filling volume of 650ml, while the SD1350 and SD1500, can be refilled with 1000ml. Compared to the SD1350, the SD1500 differs in its slimmer and higher silhouette and curved front.

DISPENSERS FOR HYGIENE- PACKAGINGS

Upright manual and touchless systems

UPRIGHT DISPENSERS FOR HYGIENE PACKAGINGS

SD5000/SD5050/
SD5100/SD5150/
SD5200/SD5300/
SD5400/SD5450/
SD5500/SD5550

This series offers manual and touchless dispenser systems for the different hygiene packagings of various disinfectant manufacturers.

The models SD5500/SD5550 and SD5400/SD5450 are stainless steel wall or bed-mounted dispensers for hygiene packaging of all volumes. SD5200 and SD5300 are wall-mounted dispensers made of plastic. SD5300 is the manual dispenser with an option for drip trays and arm levers, and SD5200 has a touchless operation option. The models SD5000/SD5050 and SD5100 are different from the wall brackets by the inclusion of the hygiene bottle in the dispenser. In those dispensers, bottles are not attached to the neck but placed in a basket.

The SD5100/SD5150 consists of a height-adjustable arm lever and a stainless steel basket that is mounted on the wall. It is available in two sizes for 500ml or 1000ml containers. The SD5000/SD5050 is a modular dispenser that is extremely flexible and adaptable, whose core component is also a basket (500ml-1000ml) of plastic or stainless steel. The baskets can be extended modularly with arm levers, touchless attachments, an anti-theft device, drip tray, bed holder, and hygiene monitoring module. All baskets are equipped with clamping springs to ensure a firm hold of the bottles.

MODULAR MANUAL DISPENSERS

(ABS or stainless steel)

SD5000/SD5050

The manual dispensers SD5000/SD5050 for hygienic packaging with 500ml or 1000ml filling volume are made of robust and impact-resistant ABS plastic or stainless steel. They have a modular design. The core is a basket with bottle fixation for the different bottle shapes of the various manufacturers. It can be fitted with an arm lever or automatic attachment, with a bed holder, anti-theft protection, a drip tray. Also, the GWA hygiene monitoring module can be added.

MANUAL ARM LEVER DISPENSERS

(stainless steel)

SD5100/SD5150

The stainless steel dispensers SD5100/SD5150 are at the same time durable and elegant. We offer them in two different sizes: SD5100 with a basket for 500ml and SD5150 with a basket for 1000ml containers. The arm levers are adjustable in height to adapt to different bottle heights. Fixed to the wall, they are easy to maintain and to use.

WALL MOUNT FOR HYGIENE PACKAGING WITH ARM LEVER/DRIP TRAY

(ABS)
SD5300

The SD5300 is the universal solution for mounting various hygiene packagings of different manufacturers. The holder is simply screwed or glued to the wall. A clamping system fixes the bottleneck of the hygienic packaging firmly with the housing. The bottle holder supports the bottle additionally from below. The SD5300 can be equipped with arm levers and drip trays in different colors: blue, green, pink, gray, and white. The levers are available in two lengths: 182mm (short) and 198mm (long).

WALL BRACKETS SINGLE OR DOUBLE

(stainless steel)
SD5500/SD5550

For customers who consciously forego arm levers, sensors, and drip trays, we offer our wall brackets in brushed stainless steel, white or black. They are furthermore available in two versions for one or two hygiene packagings. The wall brackets can be drilled or glued. To insert the hygiene pack, the pump must be separated from the bottle, and the opened bottle must be inserted from below and pushed through the ring-opening of the bracket. To cope with different diameters of the bottleneck we offer adapters to reduce the diameter of the opening of the bracket. Then the pump is screwed onto the bottle and is thus fixed. With the SD5550, Euraneg also offers a duplex version for two bottles. As an additional feature, both wall clamps also have a variably adjustable base plate. After loosening the fixing screw, they can be adjusted to different bottle sizes and thus support the bottle from below.

BED OR WALL BRACKETS

(stainless steel)
SD5400/SD5450

The SD5400/SD5450 bed or wall mounts for hygienic containers are simple and robust stainless steel bottle mounts. When a hospital bed or service trolley needs easy attachment for disinfection, the simple hook solution of the SD5400 is ideal. It can be easily attached to any bed rail or trolley handle.

Afterward, you only have to push a disinfection bottle from below through the ring-opening and screw on a dosing pump: Ready to use! Alternatively, the SD5400 is available as a stable wall mounting. That is an ideal and space-saving solution for retrofitting in any area where hygiene is a priority, such as schools, daycare centers, swimming pools, and public facilities.

SD130/SD140/
SD150/SD200/
SD210

NEW

Hand-hygiene has never been more important, and we aim to make it accessible to everyone and everywhere. Therefore we offer you our sanitizer stands and counter displays that allow you to put a preferable dispenser there where it's needed. They are especially good for highly-frequency areas. There is a possibility to choose between mounting a touchless or manual dispenser on the stand, or you can choose a hand or foot manual system with a container with up to 20l. The use of touchless dispensers is recommended for avoiding the risk of cross-contamination.

You can place sanitizer stands, hygiene towers, and counter displays in:

- toilets and elevators
- a retail store
- restaurants
- petrol stations
- railroads and airports
- fitness studios
- hospitals and medical practices
- companies, schools, and public buildings

The sanitizer stands and hygiene towers offer one more advantage, and that is the possibility to use them as a promotional space. You can design your sanitizer stands and hygiene towers according to your needs and choose between materials such as acrylic, stainless steel, or HPL.

MOBILITY

ADVERTISING SPACE

SANITIZER STANDS

(acrylic)
SD100

The acrylic sanitizer stands, made for holding your dispenser wherever needed, are available in white or transparent. Both have the same construction: a square base and a 150cm high flat supporting pillar secured with a rear supporting beam. The stand comes as all our stands with predrilled holes and screws for our wall mounting plate (SD2005-70, SD2010-70). Whether you choose the transparent or white version, you will get a firm, resistant, and well-designed sanitizer stand. Regarding your preferences, the area of the sanitizer stand can be used for advertising or information signs that allow you to send a message to the user.

Item No.	EAN	Description	WxHxD in mm	Weight	RRP
SD100	8719992814039	Sanitizer stand made of transparent acrylic (resistant to chemicals) for arm lever and automatic dispensers	300x1480x400	9kg	240,00€

SANITIZER STANDS

(HPL)
SD120

The SD120 sanitizer stand is made of high-density laminate (HPE) and is therefore very robust and resistant. The main characteristic of this stand is the possibility of an easy and quick assembly. In less than five minutes, you can assemble the stand and place it in the groove of the round base without drilling and screwing. Therefore, the display area and the supports are inserted crosswise into each other. This sanitizer stand saves time, and it is easily portable. The top of the pillar is already provided with the holes for the wall mounting plate for the Euraneg dispensers. The height of the disinfection column is 120cm, and on one Euro-pallet up to twenty columns can be placed. There is an option to choose between different colors or patterns (wood, metal, etc.) of the laminate (the minimum quantity for customization is ten pieces of one design).

Item No.	EAN	Description	WxHxD in mm	RRP

SANITIZER STAND

(stainless steel)

SD110

The SD110 is made of stainless steel, height 140cm, and characterized by stability and good visibility in any environment. For highly frequented locations, we offer an option for the extension with an additional module for containers 5-20l. The stands come as all our stands, with predrilled holes and screws for the mounting plate for Euraneg dispensers. We furthermore offer customizations with laser for the advertisement of logos (e.g. see Euraneg logo on the picture; the standard version is shipped without a logo or text on the column). Due to the compact design, several dispenser columns can be packed on one Euro-pallet.

Item No.	EAN	Description	WxHxD in mm	Weight	RRP

HYGIENE TOWER WITH FOOT CONTROL

(stainless steel)

SD115

The SD115 is made of stainless steel and comes with an integrated dispenser in it. Stainless steel makes this dispenser robust, firm, and resistant. With the 5-20l container option, the hygiene tower is ideal for high-frequency locations. The dispenser technology is integrated inside. There is an optional roller package that enables this hygiene tower to be mobile and easily ported to different locations. The foot control makes it an energy-efficient and inexpensive solution to avoid cross-contamination. With a height of 115cm, several dispenser columns can be packed on one Euro-pallet.

DESI-SÄULE STAND

(stainless steel)

SD140

The SD140 disinfection stand is characterized by its slim silhouette, low weight, high mobility, and flexibility. Mounted on smooth-running wheels, it brings hand hygiene safely and quickly to where it is needed as a "stand-alone station" in the short term or as a supplement to existing disinfection stations in the event with large numbers of visitors. In addition to the drip tray integrated into the dispenser, we offer a magnetic drip tray in chrome that can be mounted separately on the drip tray holder. This drip tray holder also serves as a carrying handle if the stand cannot be rolled. The stand SD140 can be equipped with all Euraneg dispensers and is black powder-coated or available in various colors of your choice.

SANITIZER STAND

(stainless steel)

SD130

The SD130 is a white stainless steel sanitizer stand that can be dismantled in three parts and is suitable for all Euraneg dispensers. Its height of 140cm, foldable head, and silhouette makes it easily portable and very practical. Because of the low weight, it is easy to be transported and set in the entrance of a hotel, meeting room, cinema, theater, or any other venue. Since it is dismantlable, it can be easily shipped in a box.

COUNTER DISPLAYS

(acrylic and stainless steel)

SD200/SD210

The counter displays are smaller stands for offices, reception, medical practices, restaurants, etc. They are suitable for dispensers with a small volume (up to 1l). There are two models available, transparent acrylic (SD200) suitable for modern places and small volume dispensers, and a more robust model in brushed stainless steel (SD210). They have an integrated flat drip tray, which avoids soiling of the bottom surface. The counter displays are provided for Euraneg wall mounting plates. Once mounted, the dispenser can be transported wherever it is needed.

TERMS AND CONDITIONS

I. General information

1. the following terms and conditions shall apply exclusively to the business relations with our customers and suppliers; any terms and conditions of our customers or suppliers which deviate from or contradict these terms and conditions shall only be binding on us if we acknowledge them in writing. 2. verbal or telephone agreements are only binding for us after written confirmation. 3. our offers are subject to change without notice; they must be accepted within six weeks of the date of the offer. The offers can also be accepted by placing an order. A contract but is not concluded until the order is confirmed or the order is executed. 4. set-off or retention by our customers is generally not permitted. 5. if a provision of these terms and conditions or a provision within the framework of other agreements is invalid, the validity of all other provisions or agreements shall not be affected. Should our terms and conditions or parts there contradicting the AGB act, they shall only apply to merchants. 6. delivery takes place exclusively in complete original packaging. 7) According to the Data Protection Act, we are allowed to store personal data within the scope of the purpose of the contractual relationship; the use of the data stored by us is exclusively according to the legally permissible and contractually necessary conditions. With the knowledge of these terms and conditions, our customer is considered to be informed that necessary data about him for the mutual business relationship has been stored. 8. The following applies to the business relationship in principle German law.

II. Prices

1. our prices are net; the statutory value-added tax is charged at the current rate percentage rate charged separately. 2. in principle, the prices valid on the day the order is placed shall be charged plus taxes. 3. our prices shall be a free delivery warehouse or ex-works unless another pricing has been expressly agreed. 4. in the case of customer-specific special productions (special products and/or their printing), the costs for cutting tools, printing plates, etc. are basically to be borne by the customer. 5. in case of a net order value of less than € 500.00, we will charge for the shipping costs incurred, above € 500.00 net order value the delivery will be carriage free.

III. Terms of payment

1. our invoices are payable within 20 days net cash or within 10 days with a 2% discount, regardless of the receipt of goods and the right of possible complaints. 2. the payment period starts from the day of the dispatch provision. 3. on the invoices the payment periods are additionally indicated, by which the invoice amount, possibly after deduction of discount, must be credited to one of our business accounts. For the timeliness of the payment, the day of the credit note on our account is relevant, not the submission of the payment document. 4. even if our customer has other terms and conditions, we are entitled to initially credit payments to any costs and interest incurred, then to be offset against the older open invoices. 5. if our customer is in default of payment, we shall be entitled to charge interest from the due date of our claim at the interest rate charged to us for open overdraft facilities. 6. if our customer does not meet his payment obligations or if we become aware of circumstances which may call his creditworthiness into question, we shall be entitled to make the entire remaining debt due and/or to demand additional advance payment or the provision of security, in particular for orders which are still open. 7. in the aforementioned cases we are entitled to withdraw from all contracts not yet fulfilled in whole or in part and to claim damages for non-performance.

IV. Retention of title

1. the delivered goods shall remain our property until all obligations from our deliveries of goods, including any ancillary costs, have been met in full. 2. our customer is entitled to process the reserved goods in the ordinary course of business, to combine them with other items, and to sell them, as long as he is not in default towards us. 3. pledging or transfer of ownership by way of security is prohibited. 4. the customer hereby assigns to us his rights of ownership or co-ownership of processed or mixed goods; he is obliged, at our request, to notify the third parties involved of the assignment and to provide the information and documents necessary for the assertion of our claims. 5. the customer shall inform us immediately of any seizure or any other impairment of our rights by third parties.

V. Delivery

1. the delivery period is defined as the probable date of loading or delivery of the ordered goods, depending on the agreement 2. late delivery does not entitle the customer to withdraw from the contract or to assert claims for damages. 3. if the delivery period is exceeded, the customer may withdraw from the contract after the expiry of a grace period of at least eight weeks set by him. Further claims of the customer are excluded. 4. partial deliveries are permitted and are considered independent transactions. 5. unforeseeable obstacles and delays due to force majeure entitle us to an appropriate extension of the delivery period after the reason for the obstacle has ceased to exist, without us being liable to pay compensation for any damage caused by the delay. 6. events which change or restrict the basis of the contract in whole or in part to a considerable extent, regardless of whether they occur at the customer's or our or our suppliers' premises, entitle us to adapt the contract to the changed circumstances in whole or in part, excluding compensation claims.

VI. Shipping

Dispatch shall always be at the risk and expense of the customer; the risk shall pass to the customer when the goods are handed over to the carrier, but at the latest when they leave the supplying factory or distribution warehouse. 2. in the absence of special instructions, we are entitled to choose the fastest and most cost-effective mode of dispatch ourselves at our best discretion without any assumption of liability. 3. additional costs for special shipping (express or express goods, etc.) shall be borne by the customer. 4. if goods ready for dispatch are not immediately called or collected or if the transport is temporarily or permanently impossible, the agreed purchase price is still due. 5. in the cases mentioned under 4. we are entitled to store the goods at our discretion at the expense and risk of the customer, whereby liability for damaging influences (transport, weather, etc.) on the goods is excluded.

VII. Warranty, Liability

1. the quality of the delivered goods depends decisively on the available raw materials; we are therefore only responsible for quality deviations and color changes if they could have been avoided under the market conditions. 2. we do not assume any warranty for the durability of printing inks on plastic and metal products. 3. complaints must be brought to our attention immediately after receipt of the goods, but at the latest after five working days; in the case of obvious damage, the type and extent of the damage must be noted on the consignment note/delivery bill and confirmed by the carrier's representative (driver). 4. defects or damage to part of the delivery do not entitle the customer to complain about the entire delivery or to delay payment of the invoiced purchase price in whole or in part. 5. in the event of timely and contractually compliant notification of defects, we shall, at our discretion, either provide a replacement or credit the equivalent value; further claims (damages, contractual penalties, etc.) are excluded. 6. the suitability of the goods delivered by us for a specific purpose cannot be guaranteed. 7. the customer's claims for damages in tort, in particular product liability, shall exist against us in the event of proven deliberate or grossly negligent damage and also only insofar as the manufacturer of the goods delivered by us is not liable for the same reasons. The same applies to claims of the customer from positive breach of contract 8. Warranty and compensation claims are generally excluded. if they are due to improper handling, maintenance, operation, or handling by the customer or third parties, as well as normal wear and tear or transport damage.

VIII. Place of performance, place of jurisdiction

The place of performance is our company headquarters in 93354 Siegenburg. The place of jurisdiction for all direct and indirect disputes arising from the contractual relationship is Siegenburg, irrespective of the amount in dispute. In the event of disputes, the local or regional court in 18237 Regensburg Germany, shall have jurisdiction at our discretion.
